Capacities	Reverse Cycle: 11.2kW, 14.0kW, 16.0kW Heating Only: 11.2kW, 14.0kW, 16.0kW
Refrigerant	R410A

Daikin Altherma Bi-Bloc is a highly flexible, energy efficient home heating system developed to provide homes with a total heating solution. With rising energy costs and high environmental impact, Daikin Altherma Bi-Bloc addresses these concerns with an all-in-one indoor space heating and domestic hot water heating system.

This system extracts heat from the outside air, raises its temperature and transfers the heat to the indoor hydrobox for water circulation in the underfloor heating circuit, radiators or fan coil units.

With low operating costs thanks to high efficiency without compromising on comfort, it is the perfect fit for new builds, as well as for low-energy homes.
