Daikin's Fully Flat Cassette is the first cassette that fits fully flat with the ceiling, so it blends discreetly in with the room's decor.

Fits Standard Ceiling Tiles Perfectly

The FFA-A2VEB's new panels have been designed to integrate with standard ceiling tile dimensions, enabling lights, so it's easy to install a Daikin Fully Flat Cassette, and speakers and sprinklers to be installed in the adjoining ceiling tiles.

Optional Presence Sensors

To ensure perfect interior comfort Daikin's FFA-A2VEB Fully Flat Cassette can be fitted with an optional sensor* linked to an advanced controller.

Presence Sensor

When there is nobody in the room, the presence sensor* adjusts the set point or switches off the unit, avoiding unnecessary cooling or heating and helping to reduce energy consumption.

Location Sensors

The sensor* also adapts the direction of the airflow depending of where people are situated in the room, reducing draughts and enhancing occupant comfort.

difference, redirecting airflow for more even temperature distribution.

Year Round Efficiency

Daikin's FFA-A2VEB Fully Flat Cassette delivers exceptional performance and efficiency throughout the entire year. An optional presence sensor also helps deliver even greater operating efficiency.

Air quality

Because air quality is as important as temperature for occupant comfort, Daikin's FFA-A2VEB Fully Flat Cassette features advanced filters to help remove dust particles to ensure the air is clean.

Quiet comfort

The Fully Flat Cassette is one of the quietest units in the light commercial market and, in addition to the sensors, has various functions that are designed to enhance user comfort.

Controllers

Fully Flat Cassettes are managed from a user friendly remote control with an easy-to-read LCD display, enabling users to manage various system control configurations with ease, as well as control multiple indoor units from a single remote.

**Additional sensor kit BRYQ60A2W required to enable this feature
(floor and presence sensors included)*
