

# Round Flow Cassette

Available in	Reverse Cycle (Heating & Cooling)
Capacities	Premium Inverter: 5.0kW-14.0kW, Inverter: 7.1kW-14.0kW
Refrigerant	R32

The SkyAir Round Flow Cassette utilises 360 degree airflow distribution to ensure even temperatures throughout the space, this provides a comfortable environment for building occupants all year round while also remaining discrete.

The Round Flow Cassette can be either paired with our Premium Inverter (RZAV) or Inverter (RZAC) condensers. The former offering building owners substantial operating efficiencies to help minimise operating costs. R22 retrofit capability is available for both condenser types allowing for a simplified cost effective replacement solution.
