

# 2.5KW REVERSE CYCLE A/C

Model No. HSA25R

RRP \$ 899.00

The Hisense 2.5kW Heat Pump Air Conditioner easily cools spaces in summer and warms them in winter. Heat Pump Air Conditioning technology works by absorbing heat energy from the outside air and transferring the heat into your home, while also doing the opposite when you need to cool your living space. This dual functionality makes it ideal for seasonal climates with cold winters and warm summers. Plus its 5 star energy rating means you're reducing your energy use and emissions.

## Key Features

See and get to know what your Air Conditioner is packing inside.

### SILVER ION FILTER

Every Hisense Air Conditioning unit features a Silver Ion Filter, which is an antibacterial device that helps to keep the air free from bacteria and impurities. The filter prevents the build up of mould and is 99.99% effective in preventing E. coli, and 97.14% effective at preventing S. aureus, which is more commonly known as Staph.

### I FEEL MODE

Hisense Air Conditioning units are intuitive and intelligent. With I FEEL Mode, you'll never have to adjust the temperature yourself. The Hisense Air Conditioning remote features a built-in digital thermometer that adjusts the temperature of the room based on where the remote is located.

### ECO MODE

When summers are extra hot, or when winter cold strikes, having an Air Conditioning unit constantly running can be expensive. With Hisense's Eco Mode, you can set and forget and allow your Air Conditioning unit to work efficiently without having to worry about bills.

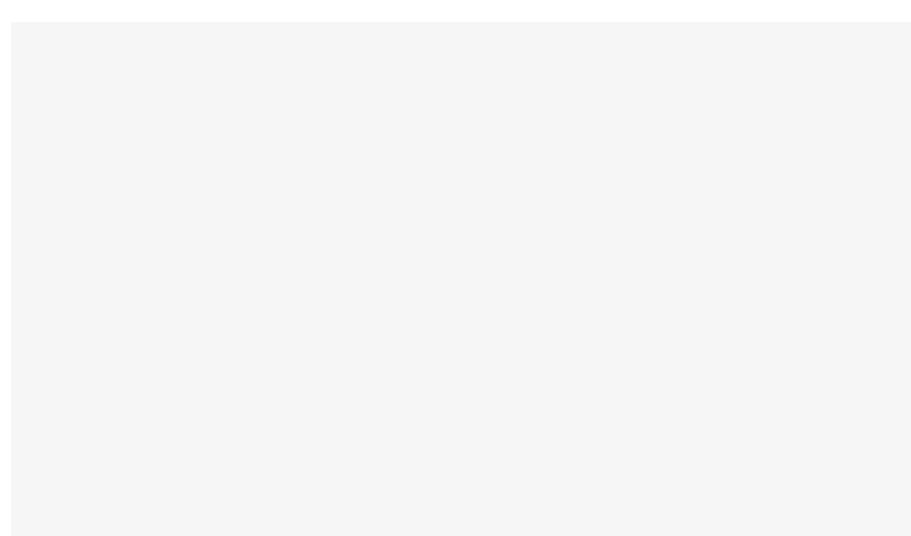

### QUIET MODE

Sometimes the gentle hum of noise from an Air Conditioning unit can be distracting. That's why every Hisense Air Conditioner features Quiet Mode, which means you can enjoy a peaceful night's sleep, or a nap, without noise interference.
